VK%`r`: repeatability (Standard deviation of repeatability/arithm.mean*100)
 VK%`R`: reproducibility (Standard deviation of reproducibility/arithm.mean*100)
 s-R : Standard deviation of reproducibility

Z-score:

= Measure of the permissible deviation from individual results at the respective reference material

$$|Z| = (C_{jk} - C_k) / s-R$$

C_{jk} = observed value

C_k = sample mean

s-R : Standard deviation of the whole data set

|Z| ≤ 0,5 = very good testing/results

|Z| ≤ 1,0 = good results

|Z| ≤ 2,0 = satisfactory results

|Z| > 2,0 = disputable results
